

Projects

To address the specific challenges in the Congo, we want to enable our doctors further training, for example as gynecologists.

Since July 2013, we operate a small stationary clinic in a rented facility. It is our goal to acquire a building of our own to be independent and permanently provide European medical standards.

You want to make the Congo a safer place?

Contact Luzeyi Kuelusukina at info@lisungi.de.

Help us spread the word!

Since Lisungi is a small charity, we depend heavily on private donations – these determine how often our mobile clinic can be dispatched. Any contribution is greatly appreciated.

About Us

The people of the Democratic Republic of Congo (DRC) are in great distress. Civil war in the east, diseases, famines and a collapsing infrastructure have led to a disastrous medical situation. Due to extreme poverty, large parts of the population have no access to a hospital. Consequently, many die from simple illnesses.

LISUNGI – the name of our charity – stands for: "help" or "assist".

With a mobile clinic, we bring basic medical aid directly to the people in the periphery of Kinshasa, the capital of the DRC. It is our aim to not only support those in need but also to provide medical education – helping the people to help themselves.

A Few Facts

"70 % of the Congolese cannot access medical or educational facilities."

"13 out of 100 mothers die while giving birth."

"Between 500 000 and 2.5 million people are infected with HIV."

Lisungi offers help for just 2\$ - a fraction of the normal costs.

Why Lisungi?

DIRECT

No administrative costs, no advertisements. Your donations arrive where they are needed most.

LOCAL

We regularly communicate with volunteers 'on the ground' and know what the people of the Congo really need.

SUSTAINABLE

Lisungi aids the domestic infrastructure by only employing local doctors. We do not just want to solve the crisis, but permanently improve the situation.
